## **11-4-09 ArchEnemy by Frank Beddor – Fiction**

4 - A great finish to a fantastic trilogy, Beddor put such a great spin on the original Alice's Adventures in Wonderland. Wonderland is without imagination and the world is changing not only there but on Earth as well. Queen Alyss is desperate to save her kingdom from King Arch and her Aunt Redd. The conclusion to the trilogy contains just as much action and intrigue as the first two books and leaves the reader pleased with the outcome even if it's not quite what was expected.
